

Package ‘TCGAMethylation450k’

October 4, 2014

Type Package

Title The Cancer Genome Atlas Illumina 450k methylation example data

Version 1.0.0

Date 2011-10-21

Author Sean Davis

Maintainer Sean Davis <sdavis2@mail.nih.gov>

Description The Cancer Genome Atlas (TCGA) is applying genomics technologies to over 20 different types of cancer. This package contains a small set of 450k array data in idat format.

License GPL-2

TCGAMethylation450k-package
The Cancer Genome Atlas Illumina 450k methylation example data

Description

The Cancer Genome Atlas (TCGA) is applying genomics technologies to over 20 different types of cancer. This package contains a small set of 450k array data in idat format.

Data are included in this package in extdata/idat. A typical way of accessing these data would be to use the methylumi package methylumIDAT function.

Details

Package: TCGAMethylation450k
Type: Package
License: GPL-2
